

SUSTAINABILITY STARTS HERE - STRAIGHTFORWARD, EFFECTIVE, SUCCESSFUL.

WHO WE ARE

WeShyft is a cloud platform for sustainable business. We combine digital technologies with comprehensive sustainability expertise. We believe that intelligent handling of sustainability data leads to more transparency, easy implementation of reporting requirements and better decisions as well as improved control of sustainability processes and activities.

WHAT WE DO

With our help, companies can record and increase their sustainability performance through automated processes and intelligent recommendations. With WeShyft, all data is in one place and always at hand which makes data collection and evaluation breeze. This creates the time needed to focus on improving sustainability instead of just fulfilling reporting obligations.

YOU HAVE COME TO THE RIGHT PLACE IF

- the collection of sustainability data is time-consuming
- the visualization of sustainability data is time-consuming
- reporting sustainability data is time-consuming

DO YOU KNOW THESE CHALLENGES?

Collect fragmented data

Monitor KPIs

Manage many projects

Evaluate risks

Being heard

Find suitable measures

THIS IS HOW WE MAKE LIFE EASIER FOR YOU

HOW WE CREATE VALUE

Standardize: With WeShyft, work processes can be overviewed, managed and simplified. Automatizations, notifications and reporting templates help to standardize processes and thus effectively save time.

Coordinate: Sustainability managers are like artists, they need to juggle many balls at once. Setting goals, implementing measures, distributing tasks. With WeShyft, coordinating all these activities is easily organized and, above all, more efficient.

Communicate: If you want to achieve more sustainability in your company, you need to talk to many people, communicate facts clearly and share success stories. We help you do this, by making it easy to create reports, graphs and charts that provide all the relevant information in no time at all.

Optimize: Once all the data and information is in one place and the appropriate indicators are selected, it is easier to track goals, make decisions, and improve sustainability performance more effectively.

OUR MODULES

FEATURES

SUPPLY CHAIN AND AUDIT MANAGEMENT

Manage suppliers and audit processes and reduce risks along the supply chain.

ESG PERFORMANCE MONITORING

Monitor your own performance, that of your suppliers or investment companies in comprehensive dashboards.

PROJECT-MANAGEMENT

Set goals, determine appropriate actions, and define tasks for implementation.

AUTOMATIC DATA COLLECTION

Automate data collection and follow up regularly.

INDICATOR-MANAGEMENT

Find the appropriate indicators from over 600 to choose from, or define your own KPIs to measure performance.

ANALYSES & RECOMMENDATIONS

Analyze performance, create roadmap and receive appropriate optimization measures.
